

MOBILE POWER CORD

The Mobile Power Cord can use either a:

1. Standard home 120V outlet
OR
2. 240V NEMA 14-50 outlet (an average of 14 miles of range per charging hour for standard-range model and an average of 13 miles of range per charging hour for extended-range model)* which we recommend installed by a licensed electrician

The Mobile Power Cord is included with your electric vehicle purchase.

*Range and charge time based on manufacturer computer engineering simulations and analytical projection consistent with US EPA combined drive cycle. The charging rate decreases as battery reaches full capacity. Your results may vary based on peak charging times and battery state of charge. Actual range varies with conditions such as external environment, vehicle use, vehicle maintenance, lithium-ion battery age and state of health.
