

# F-150<sup>®</sup> Lightning<sup>™</sup>

## Intelligent Backup Power Capabilities

### WHAT CAN I POWER WITH MY TRUCK?

With your charged F-150<sup>®</sup> Lightning<sup>™</sup> and Home Integration System, you can provide up to 9.6kW of power at any given time to your home's backed up devices. What does this mean? In a typical\* home, this might include:

#### ESSENTIALS SUCH AS:

- Lights
- WiFi
- Refrigerator
- Freezer
- Outlets (120V)  
(i.e. phone & computer charging)

#### PLUS ONE OR MORE HIGH POWER APPLIANCES, SUCH AS:

- Cooking stove/oven
- Water heater
- Sump pump
- Washer/dryer
- Heating or A/C<sup>†</sup>

Note: gas appliances that require electricity to start can also be backed up.\*

### HOW LONG CAN I POWER MY HOME<sup>‡</sup> WITH MY TRUCK?

#### STANDARD RANGE:

- Up to **2** days
- Up to **10** days powering a refrigerator

#### EXTENDED RANGE:

- Up to **3** days
- Up to **10** days powering a refrigerator

### WHAT CAN'T I POWER WITH MY TRUCK?

Very high power draws such as the following cannot be backed up by your F-150<sup>®</sup> Lightning<sup>™</sup>:

- Hot tubs and spas
- Pool equipment
- EV chargers
- Multiple A/C or heating systems
- Elevators
- Medical devices

**QUESTIONS? CALL SUNRUN'S FORD ADVISOR LINE AT 855-341-0237, OR ASK YOUR INSTALLER.**

\* When home is properly equipped. Every home is different, results may vary.

<sup>†</sup> May require additional equipment to enable backup capability, check with your electrician or site auditor. Results may vary.

<sup>‡</sup> When home is properly equipped and home transfer switch disconnects home from the grid. Based on 30kWh use per day using the F-150<sup>®</sup> Lightning<sup>™</sup>. Activation fee required for standard-range Lightning vehicles. Your results may vary based on energy usage. Rationing power refers to limiting the number of devices and turning the truck off when not needed.
