<tr>
<td>Helps maintain your choice of speed and preset gaps from the vehicle in front of you. It can also alert you to a potential collision. If one is detected, adaptive cruise control and collision warning with brake support flashes a warning via a heads-up display on the windshield, sounds an alarm, and can pre-charge the brake system to provide full responsiveness when you do brake.</td>
<td>Can detect lane markings and apply torque to the steering wheel if it senses your vehicle drifting unintentionally out of its lane. If needed, the Lane-Keeping System can also send gentle vibration pulses to the wheel to prompt you to steer back toward center. If it detects you've come too close to - or crossed - the markers multiple times, a Driver Alert System displays a coffee cup icon to suggest taking a break from driving.</td>
<td>Alerts you with a light in either sideview mirror if its radar sensors detect a vehicle in the corresponding blind spot. Cross-traffic alert, part of the system, notifies you with a beep and a warning light in your sideview mirror if it detects a vehicle approaching either side as you slowly back Escape out of a parking space. Either way, BLIS with cross-traffic alert helps keep you aware of things that may be just out of your line of view.</td>
</tr>

1 Available feature. Driver-assist features are supplemental and do not replace the driver’s attention, judgment and need to control the vehicle. 2 Lane-Keeping System does not control steering. 3 BLIS replaces standard integrated blind spot mirrors.
DON’T LET PARKING SLOW YOU DOWN.

In an Escape Titanium equipped with the Technology Package, carefree parking is right up your alley, Or street. Or parking garage. Thanks to the ultrasonic sensors and other advanced features of its Enhanced Active Park Assist System, parking reveals further talents of the new Escape. Whether looking for a perpendicular spot to back into or parallel parking, the system not only helps you find a suitable one, it steers the vehicle into place while you control the gear shifter, brake and accelerator pedals. The system also provides steering assistance when pulling out of a parallel parking space. So go ahead. Find your spot. You’ll be parked and on your way in no time at all.
PURSUE YOUR PASSIONS. When you want to escape, getting to your destination is half the fun. When equipped with the 245-hp1 2.0L EcoBoost® engine2 and Class II Trailer Tow Prep Package,3 Escape SE and Titanium models provide the power and capability to tow up to 3,500 lbs.4 of ATVs, dirt bikes, personal watercraft or whatever passions you pursue. And with trailer sway control5 monitoring vehicle motions to detect trailer sway, do it with confidence, too. To help you maintain control of both your Escape and the trailer, the system can reduce engine speed and selectively apply the brakes if needed. Just one more way Escape helps you handle what the day may bring.
With sure-footed standard FWD or the enhanced grip of Intelligent 4WD, Escape instills confidence in various road and weather conditions. With Intelligent 4WD, the system assesses those conditions about 20 times faster than the blink of an eye, readjusting as needed to deliver the right balance of handling and traction. Whether challenges include snow-packed roads, loose gravel, or even a sudden downpour, this on-demand 4WD system can help you keep your adventures on track.

Maintain your peace of mind with standard features like 7 airbags, and AdvanceTrac® with RSC® (Roll Stability Control™). Enhancing vehicle stability in a range of conditions, the system selectively applies individual brakes and modifies engine power to help keep all 4 wheels firmly planted.

Available feature. *Remember that even advanced technology cannot overcome the laws of physics. It’s always possible to lose control of a vehicle due to inappropriate driver input for the conditions.*
