Thank you for your interest in the new **2013 Mustang**. Included in this brochure you'll find information about:

**PERFORMANCE:** Mustang raises the bar yet again with an even more impressive engine lineup. The Shelby GT500™ with the 5.8L supercharged 4V Ti-VCT V8. The 5.0L Hi-Po 302 Boss® 302. The legendary 5.0L Ti-VCT V8. And the responsive 3.7L Ti-VCT V6.

**DESIGN:** The 2013 Mustang features an aggressive new look, with a redesigned front end featuring a splitter and unique LED accents in the headlamps and taillamps. Take the wheel and enjoy the modern styling and raw power of this legendary muscle car from Ford.

**TECHNOLOGY:** Mustang offers impressive high-tech features like the available Track Apps that gives you performance metrics — everything from acceleration times to g-forces measurements. Available SYNC®, Navigation System with SiriusXM, and more.

**INTERIOR:** The 2013 Mustang cockpit blends world-class craftsmanship with premium materials. A seamless, soft-touch skin wraps the one-piece instrument panel. The console with unique shifter runs in a smooth, flat arc. Modern and retro. Legendary Mustang.

THE WHOLE BROOD IN A MOOD.

Meet the Mustang family. A good group with bad intentions. For 2013, they take to the street meaner than ever, led by the most powerful production V8 engine in the world.¹ The new Shelby® GT500® delivers 650 hp² and boasts a test track top speed of more than 200 mph. Of course, power runs in the family. Boss® 302 hits the track with 444 hp² and GT is up to 420.² Even Mustang V6 produces 305 hp. But the advancements are not limited to the engine compartment. All 4 sport more aggressive design, and standard HID headlamps help you see what’s destined for your LED taillamps.

¹Based on current production models and manufacturer horsepower data. Coming Summer 2012. ²Figures achieved using premium unleaded fuel.
A BLOODLINE WITH NO REDLINE.
650 horsepower. 600 lb.-ft. of torque. Track-tested at more than 200 mph top speed. And zero serious challengers to the Pony car throne. Atop the Shelby® GT500®’s new 5.8L aluminum-block V8, you’ll find a larger, more efficient supercharger. Further enhancements include a carbon fiber driveshaft, an upgraded clutch, Brembo™ 6-piston brakes and a redesigned suspension. An optional Performance Package adds SVT-engineered Bilstein™ cockpit adjustable suspension and a TORSEN® differential. The 6-speed manual transmission is designed to handle the engine’s massive amounts of torque, and a new launch control system lets you set desired launch rpm depending on tire temperature and other conditions. And yes, this snake will bite.

650 HORSEPOWER. ANY QUESTIONS?

Shelby GT500. Ingot Silver Metallic.

1Figures achieved using premium unleaded fuel. 2Coming Summer 2012.
With a 444-hp,\(^1\) quad-exhaust Hi-Po 302 engine and a lengthy list of upgrades, proceed directly to the Boss® 302’s birthplace and rightful home – the race track. Activate the available red TracKey\(^2\) to unlock the Ford Racing powertrain control software with rolling loping idle, full race calibration and 2-stage launch control. The silver key returns you to everyday, fire-breathing “street” mode. Highlights include rear seat delete with cross-car X-brace, Brembo™ brakes with cooling ducts, a front air splitter and a TORSEN® differential with 3.73:1 gear ratio. RECARO® seats, 5-way adjustable shocks, a refined suspension and a new enhanced message center that monitors fluid temps and performance stats are also included. New reflective hockey stick graphics will have you reminiscing about the Boss of 1970, all while you launch into the future.
With its 5.0L V8 engine producing 420 hp¹ and 390 lb.-ft. of torque¹ the visceral thrill ride we call Mustang GT has power to burn. Starting now, you have more ways to control it. Opt for an automatic, and still shift gears yourself with new SelectShift Automatic® transmission. Or with a manual, consider the new available GT Track Package. Get the same TORSEN® differential as the Boss® 302, plus upgraded radiator, engine oil cooler and everything in the available Brembo™ Brake Package including 14" front rotors and unique 19" dark stainless-painted aluminum wheels. Along with class-best 26 mpg hwy² every GT has a new hood with functional air extractors.
With a 3.7L Ti-VCT engine pumping out 305 horses and the perfect note from the X-pipe dual exhaust, Mustang V6 is all Mustang. With class-leading 31 mpg hwy, it proves it mile after economical mile. Twin independent variable camshaft timing makes it all possible, and provides maximum acceleration through all 6 gears. Starting this year, you can shift each of those gears yourself with the new SelectShift Automatic® transmission. And, the V6 Performance Package is now available on automatics for the first time. But worry not. Consistent with Mustang heritage, a manual transmission still comes standard.
3.7L V6
The all-aluminum 3.7L V6 is the first engine to deliver 305 hp and up to 31 mpg hwy.¹ A DOHC design with Ti-VCT technology, it uses 2 camshafts per cylinder bank. Intake and exhaust cams can be advanced independently of each other, providing exceptional valve timing control. This helps eliminate induction and exhaust compromises, and allows the engine to deliver key benefits including low-end torque, peak horsepower and increased fuel economy.

5.0L V8
The goal for the 5.0L development team was clear — 400 hp. Ti-VCT technology was instrumental in hitting that mark, but there’s more to the story, including tubular exhaust headers, fabricated to produce more power. Cylinder heads were optimized and a new intake manifold was designed to bring more air into the engine. A high-energy coil-on-plug ignition was selected for more efficient combustion. After incorporating lessons learned during the development of the Boss³ 302 engine, the results were in: a goal-clearing 420 hp.²

Boss 302
To build an engine worthy of the Boss name, the powertrain team started with GT’s 5.0L as a baseline, then got to work. Every component was analyzed, then modified to make sure the Boss 302 could withstand all-day thrashing all the way up to its 7,400 rpm redline. Improvements abound, including forged-aluminum pistons, upgraded connecting rods, revised oil pan baffling and much more. Without the benefit of a supercharger, the Boss delivers 444 hp² and 380 lb.-ft. of torque² plus all the reliability of a Mustang GT.

Shelby® GT500®
The most powerful production V8 engine³ in the world doesn’t happen by accident. A larger, more efficient supercharger is the key to producing 650 hp² and 600 lb.-ft. of torque² but it takes more than that. Nearly every powertrain part has been optimized to deliver the additional horsepower, including a new cross-drilled block and heads and updated camshaft profiles. The entire cooling system has been significantly updated on the new 5.8L engine, including a larger fan, a more efficient air cooler, a higher-flow intercooler pump and an intercooler heat exchanger with increased volume.

How do you produce outstanding horsepower in every engine across the line? Start with one passionate development team and some of the industry’s most advanced powertrain technologies. Our engineers, each a Mustang enthusiast, brought different innovations to the party to produce these already-legendary powerplants. Twin independent variable camshaft timing, cast-aluminum engine blocks, cold air induction, dual overhead cams and cylinder heads optimized for airflow are just a few of the ways we deliver power and low-end torque. Pick your Mustang, and open up the hood, or the throttle, on an honest-to-badness technological masterpiece.

¹EPA-estimated 19 city/31 hwy/23 combined mpg, coupe automatic.²Figures achieved using premium unleaded fuel.³Based on current production models and manufacturer horsepower data. Coming Summer 2012.
THE SUSPENSIONS OF DISBELIEF.

Handling this good can be difficult to believe. But you’ll quickly get used to it. From the Shelby® GT500® and Boss® 302 all the way down the line, every model has been independently tuned, so you’ll be sure to find your ideal Mustang. They each generate serious horsepower and torque, but more importantly, they get it all to the ground. So not only do they go hard, they turn and stop exceptionally.

Go.

To turn horsepower into forward motion, every Mustang comes equipped with AdvanceTrac® electronic stability control. AdvanceTrac monitors vehicle speed, throttle position and steering wheel angle and, if necessary in slippery conditions, reduces engine torque and applies the brakes as needed. Select the Sport setting to push your Mustang while still retaining control. You can also turn AdvanceTrac off completely.

Turn.

To properly dial in every Mustang, suspension testing and tuning was performed at racetracks around the country during model development. On average, up to 7 separate test drivers were utilized at each track to provide feedback and expertise. Suspension components were selected specifically for each model. So no matter which Mustang you choose, you’ll find the right balance of handling, steering and cornering ability.

Stop.

To improve Mustang braking performance, V6 and GT are equipped with unique brakes and rotors, while the available Brembo™ Brake Package includes 14” Brembo vented front rotors with 4-piston calipers. Boss 302 includes low-expansion brake lines, while the available Laguna Seca Package adds front brake cooling ducts. For Shelby GT500, new brake pads and new 6-piston calipers are in front along with larger front and rear rotors.
BUCKLE UP AND BE COUNTED.

Monitor on-track performance including g-forces, braking times and acceleration times in quarter-mile and 0–60 increments, thanks to new Ford Track Apps™. It’s all conveniently located on a 4.2” LCD screen in the center of the all-new instrument panel. There’s even a drag racing-inspired “Christmas tree” for accurate countdown starts. The Gauge Mode offers advanced features that provide the car’s air/fuel ratio, boost/vacuum, cylinder head temperature, and inlet air temperature. Customize the interior lighting of your Mustang with available MyColor®. Choose from 7 base colors or create up to 125 custom colors for the gauge cluster’s background. Show your flying colors.

Available feature.
HIGH PERFORMANCE. FROM THE INSIDE OUT.

When it comes to Mustang performance, under the hood is just the beginning. RECARO® seats, similar to those in the Shelby® GT500® and Boss® 302, are now available on V6 and GT in cloth or leather trim. Designed to provide stability during hard cornering and other spirited driving situations as well as additional support, they feature integrated head restraints. The available premium leather-trimmed front bucket seats are still the perfect place to experience the incredible clarity and sound quality of 2 new audio systems, the available Shaker™ Audio System with 8 speakers or the upgraded Shaker Pro with 9 speakers.
Behind the wheel of a high-performance vehicle like any 2013 Mustang, your focus should be on the road ahead. Which means keeping your hands on the wheel. Fortunately, it's easy to do just that.

SYNC. Say the word.

No more searching for your phone. No device on your ear. Once paired, voice-activated Ford SYNC1 recognizes your phone and automatically transfers your contacts to support voice calling. It also plays music from your phone, MP3, USB or iPod.2 In fact, any device with Bluetooth® capability can stream audio from sources like iHeartRadio®, Pandora® internet radio and many more. Just touch a button on the steering wheel and say things like “Call: home,” or “Play genre: Alternative Rock.” SYNC AppLink™ lets you use your voice to control some of your favorite mobile apps. SYNC also offers 911 Assist,3 and with an activated SYNC Services account you get business searches, turn-by-turn driving directions, custom traffic alerts and more. Activate it at ford.com/sync.

Full-color, voice-activated travel guide with SiriusXM.

The Navigation System2 includes a 6-month trial subscription to SiriusXM Satellite Radio, Traffic and Travel Link to bring you over 130 channels of commercial-free music, plus sports, news, talk and entertainment (also featured without navigation). Drive smarter with the ability to look up fuel prices, check local and national weather, get alerts on traffic-related incidents, receive alternate route suggestions and much more. Turn-by-turn directions are offered in your choice of Fastest, Shortest or Eco Route. This system features a vibrant 8" LCD touch screen with interactive maps you can zoom and scroll. It also responds to voice commands for hands-free control. Play DVDs while Mustang is in Park and store nearly 10 gigs of your digital music.

1Driving while distracted can result in loss of vehicle control. Only use mobile phones and other devices, even with voice commands, when it is safe to do so. SYNC Services is available on most vehicles and may require a subscription. Traffic alerts and turn-by-turn driving directions available in select markets. Message and data rates may apply. Not all features are compatible with all phones. 2Available feature.
YOUR ROOF. YOUR CHOICE.

Mustang owners place a premium on freedom, and no place feels more free than the open road. With Mustang convertible, maximum performance merges with maximum open-air freedom. Drop the top on a whole new world where the rush is exceedingly more spectacular. Or go with the glass roof\(^1\) for all-season views — rain or shine. The glass roof features SPF-50-equivalent tinting that blocks 96% of ultraviolet rays. See the sun and stars, or even race the clouds.

New Vehicle Limited Warranty. We want your Ford Mustang ownership experience to be the best it can be. Under this warranty, your new vehicle comes with 3-year/36,000-mile bumper-to-bumper coverage, 5-year/60,000-mile Powertrain Warranty coverage, 5-year/60,000-mile safety restraint coverage, and 5-year/unlimited-mile corrosion (perforation) coverage—all with no deductible. Please ask your Ford Dealer for a copy of this limited warranty. Roadside Assistance. Covers your vehicle for 5 years or 60,000 miles, so you have the security of knowing that help may be only a phone call away should you run out of fuel, lock yourself out of the vehicle or need towing. Your Ford Dealer can provide complete details on all of these advantages. Ford Credit. Get the ride you want. Whether you plan to lease or finance, you’ll find the choices that are right for you at Ford Credit. Ask your Ford Dealer for details or check us out at fordcredit.com. Ford Extended Service Plan. For a purchase or lease, the Ford Extended Service Plan (ESP) gives you “Peace-of-Mind” protection designed to cover key vehicle components and protect you from the cost of unexpected repairs. Ask your dealer for a Ford ESP, the only service contract backed exclusively by Ford and honored at all Ford Lincoln dealerships. Insurance Services. Get Ford Motor Company quality in your auto insurance. Our program offers industry-leading benefits and competitive rates. Call 1-877-367-3847, or visit us at fordvip.com for a no-obligation quote. Insurance offered by American Road Services Company (in CA, American Road Insurance Agency), a licensed agency and subsidiary of Ford Motor Company. Genuine Ford Accessories will be warranted for whichever provides you the greatest benefit: 12 months or 12,000 miles (whichever occurs first), or the remainder of your Bumper-to-Bumper 3-year/36,000-mile New Vehicle Limited Warranty. Ford Licensed Accessories (FLA) are warranted by the accessory manufacturer’s warranty. FLA are fully designed and developed by the accessory manufacturer and have not been designed or tested to Ford Motor Company engineering requirements. Contact your Ford Dealer for details and/or a copy of all limited warranties.
