DO MORE WITH THE DIESEL LEADER.

Designed, engineered and built by Ford, our 2nd-generation 6.7L Power Stroke® V8 Turbo Diesel engine² produces the power and torque you need to get the job done.

**Best-in-class standard** 860 lb.-ft. of torque and 440 hp are facilitated in part by a large turbocharger, which helps improve airflow and performance. You’ll really appreciate it when towing heavy loads uphill and at high altitudes.

**Best-in-class diesel fuel economy**³ is maintained with the help of high-pressure fuel injectors that achieve a clean, efficient burn.

**Power upfits any time**, whether the truck is in motion or at a complete stop. Our class-exclusive live-drive power takeoff (PTO) provision² lets you power upfits whenever the diesel engine is running. It keeps the job going with an output gear linked directly to the engine crankshaft.

**Proven in over 12 million miles** of cumulative testing and real-world use under extreme conditions, this B20-capable engine is the most tested Power Stroke diesel ever. From 120°F scorching heat to −40°F bone-chilling cold. Rest assured, it’s Built Ford Tough.®

RULE THE CLASS WITH 6.2L V8 GAS.

The Built Ford Tough® 6.2L 2-valve V8 gives you the most power and torque of any standard gas engine in the class: 385 hp and 405 lb.-ft. of torque. Designed, engineered, built and torture-tested by Ford, this state-of-the-art E85-capable engine is the standard powerplant on F-250 and F-350.

Ease your heavy-duty workload with lots of low-rpm torque. The gas engine’s stiff SOHC valvetrain with roller-rocker shafts enables an intake- and exhaust-port layout that optimizes airflow, helping it produce plenty of torque down low.

Alternative fuel options include a CNG/Propane Gaseous Engine Prep Package that readies your truck to be upfit for compressed natural gas (CNG), propane autogas, or as a bi-fuel vehicle with the ability to seamlessly switch between CNG or propane and gasoline.

Providing flexibility and extended range, trucks upfit to a bi-fuel system include a tank for each type of fuel. Contact your local Ford Dealer for ordering details. By purchasing a Super Duty upfit for CNG or propane, you may even qualify for state incentives related to alternative-fuel use, infrastructure or vehicles. Visit www.afdc.energy.gov/afdc/laws for details.

**PULL THE MOST – CONFIDENTLY.**

Ford F-Series Super Duty is the only truck in its class offering you up to 31,200 lbs.\(^1\) of max. towing capability.

**To help you handle all that weight,** Super Duty utilizes trailer sway control. The system monitors the motions of the truck to detect trailer sway and selectively brakes as needed,\(^2\) helping you maintain control of the truck and the trailer.

**When negotiating an incline,** whether in Drive or Reverse, standard hill start assist helps you out by momentarily maintaining brake pressure until the engine delivers enough torque to move the truck uphill.

**Less manual braking** is required of drivers on diesel models thanks to engine braking performance. The diesel’s turbocharger provides engine-exhaust braking power for grade descent control with less wear and tear on the wheel brakes and transmission. Engine-exhaust braking includes a manual push-button control on the instrument panel. Super Duty just keeps on helping you get it done.
